REGISTER**

Non-attendance is a leadership issue. Absenteeism is often the first indicator that students are struggling. Join in a panel discussion with school district executives and expert practitioners from coast to coast about leveraging student participation and attendance data for developing and evaluating decision-making matrixes for next year: Learn how they leverage data to support students who have not been reached, increase parent engagement and build relationships with families and their communities in order to address the root causes of low achievement and absenteeism.
